Morphochems vision is to create a new evolutionary drug discovery process ...

... using chemical genomics to discover and develop next generation therapeutics for major disease areas.

The Company has integrated novel chemistries with biological screening using custom informatics tools into an unparalleled discovery and optimization engine. Highly selective therapeutics with minimal side effects are being selected for in-house and partnered development.

With its three research sites in Munich, Basel and Princeton, Morphochem is a fully integrated, transnational drug discovery company.

Within this part of the site you can learn more about our management team, our scientific advisory board and locations.
